City of The Colony News Release

The Colony, TX – January 4, 2012

ONCOR to Rebuild Transmission line

ONCOR Electric Delivery Company will be rebuilding an electrical transmission line along their existing easement through The Colony from their substation located near the 5100 block of Clover Valley Drive to the southern city limits. The new line will be rebuilt to facilitate the need to increase the electric power transfer capacity in the city. Construction crews will excavate soil, as well as install new foundations, new structures and new wiring. The removal or trimming of trees will be required inside and along the easement to allow access for the construction contractors and to meet safety and reliability requirements. No outages are expected for residents or businesses during the course of this project. The project is being conducted and paid for by ONCOR. Construction is set to begin Monday, January 9th and continue through July, 2012.

If you have questions about this project you may email Brant Shallenburger at bshallenburger@thecolonytx.gov or call 972-624-3108.
